Oposing Termination of Pregnancy Bill 2018
Monday, 3 September 2018 7:55:17 PM

Dear Sir,

I am writing to oppose the Termination of Pregnancy Bill 2018. I am appalled that this Bill is calling for the legalisation of abortion on demand up to 22 weeks with no regard to the fact that the baby is a fully formed little individual at this stage and capable of feeling the pain that is caused by being torn apart in order to abort the pregnancy.

Furthermore, I think the Bill's intention to allow this heinous practice to be carried out on babies 22 weeks to full term with the minor condition of a second doctor's approval is so horrendous that it should be considered murder of the innocent who should have the right to expect and receive protection from a civilised government.

I believe that the majority of reasons for introducing this Bill can be addressed by legalising medical prescription of RU-486. Although I am saddened and appalled at the death of healthy first trimester babies through the use of this medication it is preferable to the heinous process required to abort 2nd and 3rd trimester babies.

Yours sincerely,
Beryl Diggles
