Abortion Bill  
Tuesday, 4 September 2018 2:22:32 PM

---

Dear all in the Health Department

Some time ago I lodged a submission to the Law Reform Commission following the guidelines that was suggested.

At the time I believed this is all a set up, the type of questions etc.

This Abortion Bill is nothing but **primitive**. As I stated before this our laws prevent us from killing so many

animals because of animal welfare and cruelty. Now the hypocritical wise leaders are about to kill human

babies. Anyone who votes for this Bill should be charged for murder.

Granted, there are circumstances that require an abortion

- We live in a very technical time where a foetus with serious problems
- Cases of rape
- Cases that concern the woman's health
- Etc

Also our modern time birth control is possible in many forms

Education sure is vital. Prevention is better than cure. How many girls and young women really understand their oestrus cycle in that they are no different to a female animal

(humans are animals) [REDACTED] Counselling and education at the time of an abortion is too late. Women and girls that require an abortion, fair enough.

In our society the fools are running the show, People like Trad. Absolutely disgusting, they upset me.

I would like to see figures on other cultures, for example do [REDACTED] get abortions. I have a feeling that they don't or at least very few.

I have a feeling this email will be deleted as it is not in the correct format.

I do hope this Bill is rejected, which is my view.

Yours sincerely

Col
