**RE: Termination of Pregnancy Bill 2018**

I am writing to urge you to vote down the Termination of Pregnancy Bill 2018.

On reading the bill, I find that the bill does not protect life, but seeks to destroy the life for societies most vulnerable, babies.

Babies, new life that two consenting adults have contributed to, should be protected. These members of our community, who are voiceless, need to be cared for and cherished, not killed as an unwanted accessory.

As well as failing to consider the rights of an unborn human, this bill fails to address the rights of one of the two consenting partners, the father of the child, as well as the rights of medical practitioners with a conscientious objection.

The bill fails to address the need to educate or inform the mother of the child of their options.

With such a bill in place, who will speak out on behalf of our most precious members of society? Who will have the right?

These babies, although unborn, have functioning hearts and brains, and thus need our protection.

**Heath Henwood**
