Health Department Qld Government Brisbane

Dear madam Trad & those to whom it may concern!

I am Queensland an Aged pensioner!!!! and Nurse of many years (retired)
And am now expressing my very deep concern and distress regarding the Proposal by MP
PYNE to again press to have yet another Abortion bill introduced to our state; My request
is that this horrific bill not be considered again! That the Gov honour their prior statement
that QLD law on abortion will not be changed;

That the murder of viable term babies shall not be legalised

That respect for the health and rights of the unborn and their Mothers be protected! and
that the rights of medical staff and those connected to our families and our community
to have freedom of speech;

In closing I ask?

Just how many wonderful and brilliant and capable people who have been aborted may
have lived and become Scientists doctors Professors teachers leaders and soldiers
& musicians I.e. Beethovens and Bachs and Churchietcs and all geniuis's and our own
brothers and sisters maybe whom we would have loved? Do we even know what we
are doing ?

Medical science has developed wonderful discoveries on how to keep alive prematurely
born babies and huge dollars are poured into the Prem Babies nurseries to sustain life
= While many long for and wait for the day they may be able to adopt an Australian born
Baby and not have to travel overseas to rear a child they long for Why? Why? Why? Kill when
these little ones have been given the GIFT OF LIFE

Choose 1 LIFE

Many are the views of others for personal reasons

But This is mine !

Yours Sincerely

Lois Waller
