Subject: [SPAM ?] Termination of Pregnancy Bill 2018
Date: Tuesday, 4 September 2018 2:00:17 PM
Importance: Low

Dear Sir,

I wish to express my strong opposition to the abortion of babies.

Unborn children, in my opinion still have the right to be considered as human beings.

As a society we are against the death penalty for adults who commit the gravest of actions. How can we sentence the unborn to death who have not done anything wrong.

In today's society we have the technology to prevent pregnancy. So don't put to death the result of intercourse as the resulting pregnancy is inconvenient or I've changed my mind or it may put me into financial hardship.

While there may be an argument for termination if the fetus is deformed or shows major physical or mental disability, Usually such diagnosis is made during the very early stages of pregnancy.

I believe that only in the most serious of circumstances abortions could be considered and certainly as a last resort.

I certainly believe that abortion is definitely not to be performed on children who are approaching full term. I also strongly believe that abortion should not occur once the pregnancy has reached 3 months duration.

Lets face it abortion is murder of the innocent who are at their most vulnerable.

Let us show that we are a compassionate and caring society by not allowing this bill to proceed.

I hope that as a society we are better than that.

Ivan Rickard
