**Subject:** Proposed Queensland abortion law reform bill.

To.

Health, Communities, Disability Services and Domestic and Family Violence Prevention Committee.  
Dear Committee,

We are totally against the proposed changes and absolutely disgusted at it evenly being considered. Life starts at conception and in the case of human beings takes approximately 9 months to birth. The baby has a fully formed heart that starts to beat at 4-5 weeks, a brain that shows activity at about 8-9 weeks etc, etc.

To KILL that child at any stage is before or after full gestation (birth) is in our opinion MURDER in the 1<sup>st</sup> degree, and should be treated as such.

With modern medical science, problems with the growing child can be detected in the womb that may affect its growth and birth and life of the mother.

The life should not be terminated for any reason unless those conditions exist and confirmed by at least two doctors.

The child does not have voice yet, so we hope to speak for him/her.

[REDACTED]

Roy and Barbara Lansdell,
