Subject: Termination of Pregnancy Bill 2018
Date: Tuesday, 4 September 2018 9:47:33 PM

Dear Members of the Queensland Parliament Health Committee

From my readings over recent months about the proposed Termination of Pregnancy Bill 2018, I am strongly not in favour of what it appears to contain

- Taking the life of a healthy living human, irrespective of its age is morally wrong.
- Only in exceptional circumstances related to the health of the mother and child in the womb should any termination be considered
- I understand that any abortion is most likely to have a serious physical and emotional effect on the woman and could also affect any others in the family; so consequently many are involved with this decision and procedure
- Please do not disregard the possibility of adoption into a loving family if there is a serious reason why the new born could not be brought up in the original family

Thank you for your consideration of all submissions related to this Bill

Denis
