Dear Sir/Madam,

Please consider the following points with regard to the proposed legislation:

1. I believe you are on the right track towards making the termination of pregnancy an issue which is beyond the jurisdiction of law.

I would like to see it neither legal nor illegal. I believe it is too important an issue to be decided by law. Moral choice in such matters should be a matter of human values. How do you legislate that people should love life, protect lives, search for truth, or indeed, even be happy? Pregnancy is one of these values. You hope every woman (and man) loves it, and society must do everything it can to make it possible for a woman to love pregnancy by making her life secure and by educating her and encouraging her in right values. I do not see a place for coercion by the state either for or against in this issue. I believe in its place there should be good education and personal support given so that every woman may continue her pregnancy and love the child to whom she gives birth.
