This movement to change the bill for Abortion gravely concerns me.
Cruelty animals get more media coverage and community concerns than this issue of murdering babies.
I have a very healthy 12 year old grandson.
Medical concerns at 18 weeks, the consultant recommended abortion for medical reasons as they believed the baby would die at birth.
There this baby boy was given a name at 18 weeks and his parents decided against termination.
Thank God as I do have a scan showing this presious baby at 18 weeks sucking his thumb.

That says it all!!

Where will lead our society?. will we see the termination of life for mentally unwell, frail aged and those who do not contribute to society.
We have a very Me society, very egoistic about one self!!

Enough said!!!!
Where are our ethics.

Alice Satterthwaite
