Subject: Abortion bill

[REDACTED] [REDACTED]

I wish to state that I don't believe abortion post 22 weeks should be allowed. A life that could be saved with medical intervention should not be taken with medical intervention. This, I believe, goes against a Dr's Hippocratic oath.

I think all Dr's should have a right to conscientious objection and not be forced to perform such a procedure.

I also believe there should be independent counseling made available both before and after an abortion at any term, so that before - it is clear that this is truly what the woman wants and she is not being coerced into it or just thinks there are no other options, and so that after - any emotional trauma is dealt with.

Thank you for the opportunity to tell my views to the committee.

Amanda Van Der Poel
