Re: Submission Against The Termination of Pregnancy Bill 2018

Dear Members of Health Committee,

As an eligible voter I urge you to vote against The Termination of Pregnancy Bill 2018.

I object all parts of "The Termination of Pregnancy Bill 2018", because I am totally opposed abortion. However, in this letter I specifically want to mention, "This Bill Part 2 5, on page 7" allow abortion up until to birth for any reason is abhorrent to me. which give permission to murder a defenseless child, a total disregard for human rights.

In a recent survey YouGov Galaxy poll, an overwhelming number of voters responded against this abortion bill which need to be taking into consideration by our state government. For example only 8% of Queensland voters supported the sex selective, a vast majority of 83% Queensland voters are opposed to the idea of abortion based on unborn baby's sex, and 9% of that pull answered don't know.

The Communist China Government established the one child policy, allow parents to choose abortion based on sex, cause the ration of men to women to be 6:1 in China. This decision brought a devastating effect in young men's life today, there are not enough girls available for them.

I hope the voice of the majority of the Queensland are heard and represented by our local parliament members correctly.

As a voter I would certain not vote for my local state parliament member who voted in favor of "The Termination of Pregnancy Bill 2018".

Kind regards

Cindy Barrie
