Prevention Committee
Subject: Abotion Bill

[REDACTED] [REDACTED]

I would like to emphasise that I do not want this abortion bill tabled or passed in the Queensland Parliament. It is abhorrent that an infant that has a heartbeat is murdered. If the infant is naturally born at early gestation it is deemed murder to kill it. I implore you to think of the long term ramifications of this bill. I want to be on record that murdering a child with a heart beat is Murder. Regards Christine Eckhardt
