Subject: Termination of Pregnancy
Categories: Submission

I filled in an online response to my concern on the Bill on the Termination of Pregnancy now present in the Qld Parliament. I keep thinking of the overwhelming after-effects in many mother's lives. This Bill is against Life and against the well-being of the mother as you cannot prepare the **MOTHER** for this experience, as you cannot protect **HER** from the after-effects, which are trauma, emotional stress, loss, accusation, guilt, remorse, and continual thoughts of what might have been had I gone thru to birth. She also has to manage her own body that was full of expectancy, and now this LIFE has been suddenly taken from her. This unnecessary intrusion has now created a life-long sickness which so many can never-never forget. This brings us to continued medical care which we brought about by our actions. Think, Think on what you do, please. Cyril Westbrook
