Every child conceived in the womb is entitled to life. None of us can judge the potential of any unborn child. Are you really willing to make that call and allow full term abortion when most of the people in this state disagree?? I beg you to reconsider.

A professor in a college ethics class presented to his students with a problem. He said, "*A man has syphilis and his wife tuberculosis. They have had four children: one has died, the other three have what is considered to be a terminal illness. The mother is pregnant. What do you recommend?*" After spirited discussion, the majority of the class voted that she abort the child.

"Fine," said the professor, "You've just killed Beethoven!"  
I like many others, down through the years, have loved Beethoven's music.

Sincerely  
Derek Bound
