Subject: Abortion Legislation
Categories: Submission

To the members of the health committee entrusted with the Abortion Bill,

This is my personal plea.

An unborn child is a child, a human being, a life all of its own.

The child is defenceless, can not speak, can not ask to be allowed to live.

The unborn child can not ask for pain relief, does not know its fate, is not asked what it wants.

It is against the law to kill our native animals, if this Abortion law passes, it will not be against the law to kill an unborn child.

In each abortion there are two people involved. A mother and a child. The unborn child has no choice.

Allow these children their life to live.

Please renew adoption laws and allow greater access through adoption for childless couples. The child will have life and couples will have children to care for. Is this not a win win.

We are here because our parents did not abort us. We are the lucky ones.

Give greater support and protection to women who are raped. They deserve to be cared for, loved and protected. We are not a poor country, we can find the money to do these things.

There is a place in this world for all people, even those with Down syndrome and birth deformities. All these little ones are people. Beautiful people.

I implore you to give unborn children the right to their lives as people who are born enjoy the legal protections that safe guard our lives.

Please protect the unborn child.

Derek Hume
