[REDACTED]

I wish to urge the health committee to vote against this new Termination of Pregnancy Bill 2018.

I believe that fathers who want to keep their child will have no say to keep their children. This bill would also allow for sex selection abortion. What is our society coming to --trying to manipulate the makeup of the population.

I wish to complain also that this bill allows for abortion up till birth for any reason. To me that would be like murdering a baby. Life is precious.

As government elected by the people please listen to the voice of reason and vote against this bill.

Dawn Litzow
