Hi to whom it may concern.
It all seems to be that we are all patting ourselves on the back after banning plastic bags –save the turtles etc.
But how come this same value is not applying to Human life.
If there is any decency left ,this bill will be squashed-I can't begin to image way or how murdering babies (and that is what this is) has even gotten this far.

I have a novel idea –how about balancing our budget instead of spending \$\$\$ that we don't have and will spend an eternity trying to pay back.
Your inability to run our state (to balance to budget etc)means that you should stay out of important moral issues that will only bring our country down even further if that is possible!

Thank you

David Prior
