**Subject:** Abortion Laws  
**Categories:** Submission

Why are we killing our young?

We now have more Australians killed every year by abortion (circa 80000) than Australian killed in the entire World War 1 (circa 60000). That is outrageous - and wrong!

The money spent on abortions should instead be put into education men and women into making responsible choices - so abortions are not necessary and life is valued and not discarded.

Mothers and their families should be given support and encouragement to keep their children.

Please do not proceed with the new laws.
