**Subject:** Jackie Trad Abortion Bill

I wish to oppose the above Bill.

I do not believe abortion should take place up to full term. I believe this bill is trying to legalise murder - it does not take into account the emotional and mental after effects of people who have had Abortions.

My response is No to each aspect with the exception of extreme situation in which the mother's life is under threat.

No way should anyone terminate a child because he/she is not the sex they wished for.

This Bill needs to be defeated and a humane response for protection for the unborn child should be paramount.

Thank you
