**Categories:** Submission

Abortion

While there are circumstances where aborting a foetu can be justified, for example when the life of the mother is threatened, the proposed bill goes far past that point.

For a number of reasons, we don't engage in capital punishment even of those who have committed heinous crimes, yet this bill allows for the execution of innocent lives.

This is an horrendous. probable outcome.

The provision to force to doctors to refer a women seeking an abortion on to an abortion provider even though abortion is seen as an unacceptable outcome  
This transgresses medical responsibility and conscience.

This bill would facilitate taking the lives of viable unborn for comparatively trivial reasons including inconvenience for prospective parents.

The scope of this bill is unacceptable to me and many other clear thinking people

Gregory r Dunstan
