Subject: Termination of pregnancy bill 2018
Categories: Submission

I wish to express my strongest objection to this horrendous bill that is to be debated in Parliament shortly.

Where are the rights of the unborn child? The child does not have a say in this.

Where is the mental health support for the woman?

The rights of the father are not being taken into consideration There is discrimination against the woman who has chosen to give birth to her child when she is not even allowed to walk past a termination clinic while pushing her child in a pram.

I can only hope that commonsense will prevail and that our Parliamentarians will see the long term effects in giving a yes vote to this terrible bill. I am horrified to think that any woman would want to see this bill passed.

Thank you

Heather Drew
