Subject: Termination of Pregnancy Bill 2018

Hi Michael

My wife (Carol) and I live in [Redacted] which obviously makes you my local member.

I am emailing you to express my serious concern regarding the above. To be honest Michael, when I heard about this proposed piece of legislation, I couldn't believe what I was hearing. Further digging into what this bill could enact has quite frankly left me speechless.

How on earth can any piece of legislation be even considered when the other end of the thin wedge will enable the lawful termination of a human life apart from possibly to avoid the death of the mother and baby.

I am appalled that any leader in our society could think that this is a necessary step to take; without question, a baby is a human being from conception and to legislate his or her demise for any reason other than the life threatening safety of the mother and child, is unimaginable.

I assume others will disagree (although I haven't had a client of mine express anything but disbelief as well) but I ask you to exercise your right to represent my view to the Qld Parliament.

Thank you.

Ian
