Subject: Termination of pregnancy bill
Categories: Submission

I would like to submit my objection to the "Termination of pregnancy bill" as I believe it takes the life of a human being and by law is murder. The right of the child is taken away and is replaced by a casual decision made at the moment that should be helped by counselling and support. I believe what is in place now covers extreme situations. Also the after the affects to the woman leaves her with regrets. I ask why would we want to destroy a child's life when so many want to adopt. I believe it is inhuman and beyond what a modern civilised people should be deciding to do and is not considering the right of another person, the child.

I strongly oppose this bill and wish to lodge my strong and sincere objection.
