Subject: Please help
Categories: Submission

Hi,

It is in every individuals best interest to give an unborn child the best chance at life despite their gender or health. We all know doctors make mistakes. They are human. They can get the gender incorrect, they have also incorrectly diagnosed unborn babies of debilitating abnormalities coursing parents great distress only to give birth to a perfectly healthy child. I personally have 2 friends who have been asked by doctors to abort and when they refused went on to have 3 healthy children between them. There are many stories of people painting rooms pink or blue and naming their unborn child only to give birth to the opposite sex.

Please don't ignore our pleas to stop this. We ask that more focus and funding is put towards helping our mental health facilities. [REDACTED]

[REDACTED] Providing more safe houses and funding for single parents would be a more appropriate approach.

This is not the way to help women. We are stronger than this. We need to be resilient. We are the mothers of our next generations to come. Abortion may seem like the easier way out but it is not. Please stop the abortion bill!

Regards

Kayleen Dobbins
