Subject: Concerned about proposed changes to abortion in Qld
Categories: Submission

Dear Committee members,

I am writing to express my concern for any changes to the abortion laws as proposed by the government. I do not want the laws changed and believe that the thousands of abortions currently taking place is state sanctioned murder.

I know that sounds harsh, but it is the intentional taking of life. If it were a matter of life or death for the mother that is another thing. But the way things are, if a child is unwanted and the mother wants to get rid of it they can.

Please do not support the proposed changes.

Yours faithfully,

Mike Parker
