Subject: Abortion bill
Categories: Submission

Edited

My name is Ozlem Wairau. I am a 32 year old Australia citizen. I would like to be a voice for those who cannot speak for themselves. Abortion itself is terrible but a late term abortion is pure evil. Who in their right mind would allow innocent beautiful babies to be murdered. There must be another solution. Why cant the government put the money towards counselling and support and adoptive services for women in a dark situation where the only solution she can think of is to have her babies life taken out of this world. No one not even a mother has the right to take a life whether the baby is in in her arms or in her womb. Please fight to have this evil backwards law put in the fire where it belongs. Please dont allow many babies lives to be taken in such a horrific manner. These babies cannot defend themselves, but we who have a voice can. This will affect me as a human being as I care for babies and I do not comprehend how any adult with a working brain would say a baby is not a baby just becuse its in his or her mothers womb. They can feel pain they have a soul, please do whats right and stop this.

Signed O Wairau
