Subject: Re proposed changes to abortion laws.
Categories: Submission

Please note that I have already completed a submission in regards to the proposed late term abortion laws. As I had difficulty it submitting it, I have also decided to send an email. I do apologise for adding to your workload in any way.

I am totally opposed to the proposal to allow late term abortion in Queensland. All human life is sacred and the late term termination of pregnancy should only be undertaken where there is a danger to the life of the mother or child. I have read that there have been a number of occasions in Western Australia where late term abortion has been conducted and that a child has been born alive. I sincerely hope that this situation will be carefully considered by the committee.

Thank you for your consideration of this very important matter, Rosemary Chandica, [REDACTED]
