Subject: Termination of Pregnancy Bill 2018
Categories: Submission

To Health Committee

I wish to oppose this bill for several reasons:

science shows it is a baby, a member of the human race, at 22 weeks and earlier even though it looks different.

doctors should be able to follow their conscience and not be forced to abort.

proper counseling and support should be given to the mother. There are at least three groups in Brisbane which do help the mothers but more needs to be done by government

if used for sex selection, girls are more likely to be aborted

Yours faithfully
Sheridan Sawarde
