Subject: Termination of Pregnancy Bill 2018
Categories: Submission

- **I believe as with the majority of Queenslanders that abortion can harm the physical and/or mental health of women. I can say from personal experience as this happened to my neighbour who for many years has lived with the overwhelming grief and regret of her decision and has never ever gotten over it .** There is a lot of evidence about the serious physical and emotional effects of abortion on women, and as a consequence, on their families. Physical risks include infection, haemorrhage, infertility and breast cancer. Psychological risks include depression and other mental illness, suicide, attempted suicide, drug and alcohol abuse, sexual promiscuity and general poor self-esteem. Every life is precious !!
- This bill needs to be defeated as thousands of babies lives are at stake here ..this is murder and I believe the blood of these innocent babies will be on the hands of all those who vote this bill in.
- Thank you for taking the time to read this .

- Sheena Thornton
