Subject: Proposed Amendments to QLD Abortion Bill

Dear Sir / Madam,

I would like to formally add my voice and vote AGAINST any amendments to the proposed Amendments to the QLD Abortion Bill. I do fully accept and agree that pregnancy for women in some cases is a difficult situation, medically, physically, emotionally, and I do agree that more could and SHOULD be done to support women in that situation. However, under the existing legislation, no person has been charged with an offence which would indicate that the current laws are adequate. Therefore there is no defensible rationale nor need to change the legislation. I urge you to retain the existing legislation.

Yours sincerely,
Tim Lithgow
