Subject: Proposed changes to abortion laws
Categories: Submission

When is an abortion worth killing someone for?
Please ensure that the termination of human life in pregnancies which are not life threatening to the child or the mother are not legally permitted.
Do not allow circumstances where a pregnant child or victim of DV can be coerced into an abortion they don't want, because medical practice or the law will permit termination of unborn life without justification.

Vote down the proposed changes. Our current laws are lax enough that a woman can obtain an abortion legally and safely when needed.
