Subject: Medical cannabis/[REDACTED]

Dear member of the committee thank you for the opportunity to make a submission regarding the health and other legislation amendment bill 2018. My submission relates to the repeal of public health medicinal cannabis and the difficulty I have had obtaining a prescription for cannabis and the insurmountable costs in getting 1 through the access clinics set up through the corporate drug dealer suppliers. Quote the palszcuk government is committed to ensuring that Qld health legislation is serving the need of Queenslanders as in advanced medicines and changes in circumstances. My son [REDACTED] has severe epilepsy that continues to play havoc on himself and his family my son has no quality of life and struggles daily with this condition and we as are family are broken by this the medication he is on makes him violent and aggressive. I am pleading with our government to let our family and families like us to make informed decisions about his health and given permission to grow and make oil that he so desperately needs, we are at our wits end with this and desperately need help. Thank you for taking the time to read this yours sincerely [REDACTED]
