Subject: RE: Inquiry re Establishment of QLD Health Promotion Commission
Categories: Regd, Printed

Dear Health and Ambulance Services Committee

The Torres and Cape Hospital and Health Service would like to provide the following comments to the Inquiry:

Health Promotion and Prevention

The Torres and Cape Hospital and Health Service population has relative lack of access to culturally-safe health promotion and prevention programs specifically targeting lifestyle diseases (smoking, nutrition, communicable diseases) and men's and women's health. We have no capacity to initiate local health promotion activities.

This response has been cleared by the Health Service Chief Executive.

Regards

Heather
