Submission Against Proposed Abortion Bill  
Saturday, 25 June 2016 8:12:40 AM

---

To the Research Director, Health, Communities, Disability Services and Domestic and Family Violence Prevention Committee,

I write this email to oppose the abortion bill that has been put forward by Cairns MP Rob Pyne. I give the following three reasons.

1. Modern medical research has shown us the advanced state of human life in the mother's womb. Regarding late-term pregnancy, the baby in the womb even survives premature birth, so how can the Government consider any late term abortion as being anything else but the killing of that life?
2. This law will bind the medical practitioners of our State to be involved in a procedure that is not a sickness or a threatening conditioning, as pregnancy is a natural operation of the human body's genius. Please allow our medical practitioners the right of conscious to not be involved in abortion procedures.
3. The State Government has the responsibility of overseeing policies regarding the environment, education and economy of our State. In my humble opinion, these areas are not going well, and the government should direct its attention to legitimate issues of need at the present time, rather than divert its business to laws that have no benefit to better governance of the people of Queensland.

Yours Faithfully,  
Robert Herrgott
