---

Dear sirs/madams,

This is just so very distressing. What is being aborted here? This is a totally developed human being that is waiting to come healthily out of its mother's womb and take its first breath. My comment regarding this proposed change to the law regarding abortion is that allowing abortions to happen up to the due date is nothing short of murder. Ait is intentionally taking a life. To "kill" this child cannot be allowed. Does Mr. Pyne have children?? Has he seen a new born full of life that is just the beginning of what is to be a complete and long life?

No abortion should be allowed...however the law is the law regarding this. BUT late term abortions just cannot not be allowed. The way these little living human beings that are developing in the womb are literally being killed is horrifying. Can you imagine the pain these tiny babies are going through. Just embryos?? What in the world do people think these embryos are - chickens? Birds? No...they are human beings from the very beginning. That is just what they are – they will turn out like you and me – people living full lives. It is not our right to take this from them.

It is with utter dismay that there is a need to write this email and I hope you will see just what this bill is doing and not accept it.

Sincerely,

Corinne M. Lindsay
