Committee,  
Abortion Law Reform.

Submission.

We find it unbelievable that a civilized country like Australia would follow, allow, and promote practices with human birth that belong to the dark ages and unenlightened people groups in past ages.

Every person voting to pass this proposed legislation should be willing to be present at an abortion where a healthy baby is allowed to die, following an abortion. There are animal rights groups with more compassion for the life of a cat than others have for a human life. It is incredible that tens of thousands of dollars are spent on heaps of elderly people and we kill perfectly healthy babies. There must be grey areas, there are circumstances when there is reason, and concern for the tiny babe or the mothers life is in question, but the current lawmakers wanting change, should talk with both women and men who have problems, and are suffering because of their abortion history.

Of serious concern is the short and long term effect on medical, nursing and ancillary health staff and others who against their will and conscience, have to perform barbaric procedures and dispose of live fetuses.

We believe that public opinion, when informed with the facts, procedures and outcomes, would not support this proposed change to abortion laws.

We go further to proclaim, The Sovereign God of the universe is not mocked without consequences and justice. He said, "Thou shall not kill."

Yours sincerely,

Graeme and Elizabeth Furlong.
