

Subject: I OPPOSE the Abortion Law Reform (Women's Right to Choose) Amendment Bill 2016

To the committee investigating Abortion Law Reform,

I refer to the following proposed act: *Abortion Law Reform (Women's Right to Choose) Amendment Bill 2016*:

I stand opposed to the proposed act for the following reasons:

This bill would allow little children to be KILLED right up until the very moment of birth. Think about what this means. In a hospital, two women enter a hospital. Both are 9 months pregnant. One leaves the hospital with a live baby. The other one is allowed to kill her baby. This is barbaric.

The Queensland community overwhelmingly opposes changing the current law. Me included.

The proposed legislation could actually FORCE nurses, doctors and/or health care providers to violate their consciences and assist in the murder of children. What about the rights of health care workers to choose? Furthermore, what about the rights of the UNBORN to choose to live? Is this bill only supporting the "choice" of some while ignoring the others?

This bill does nothing to really help women who either have suffered the psychological trauma of abortion or assist those who believe that abortion is their only option. What about helping those who need help instead of helping them kill their little Queensland children?

PLEASE oppose this bill.

Sincerely,
Mr Shane Stegemann
