To whom it may concern

I am deeply distressed by the proposed changes to abortion laws which allow a child to be killed right up to the moment of birth. My questions to you are...

1. Do those proposing this change have any idea HOW these procedures are carried out?
2. If a women gives birth & dumps the baby in a garbage bin she is charged with murder & vilified by the community. What is the difference?
3. What options will be given to medical staff who don't wish to be involved for reasons of conscience?
4. How does this align with 'Sophie's law' which seeks to prosecute those who through violent actions kill a child in utero?

We are horrified if our cattle are inhumanly killed in other countries. Whales are slaughtered by Japanese fishermen. But care nothing for our unborn, voiceless babies. The hypocrisy is absolutely mind blowing.

Yours faithfully

Kristine Wheeler
