---

To whom it may concern. It is said that a woman is boss over her own body. That is fine when you can make decisions concerning your own body, but babies growing inside a mother's body can not make decisions for itself and if it could it would not want to be killed.

It is said that babies growing inside a mother's womb are only a "blob" and are not human (alive) but when an abortion takes place and the needle is inserted into the baby scans have shown that the baby tries to get away from the needle. It is also said that sometimes the baby is not dead yet and emerges alive and has to be drowned in a bucket placed nearby for that purpose.

It is unbelievable that we live in a country where we can do to children that we would not be allowed to do to animals.

Shame on anyone being involved or has anything to do with abortion. Killing an unborn child is not murder, but killing a child that is just born is murder.

Please check your conscience and do what is right for the unborn child!!!

Yours faithfully Hendrik (Chris) van Houweninge [REDACTED]
