Dear Sir/Madam,

I am simply staggered that this is happening. We all know through technology what happens in an abortion. An unborn baby is torn apart. Please, even turtle eggs have more protection than our own children. Why is there so much wilful blindness regarding this procedure, and the effects on the mother? Depression, cancer, increased reckless promiscuous lifestyle, alcohol and drug abuse....and we still label this a "right"? Does no one have the courage to take on this Goliath industry?

Regards,

Sherelle Carman
