SUBMISSION RE ABORTION

We must protest against any attempt to legalise abortion in Queensland. We note with disgust the intention of Labour member Rob Pyne to introduce an abortion bill into the Qld Parliament.

This nation already has the moral burden of the devilish Victorian and Tasmanian abortion laws where the murder of viable children right up to the moment of birth is legalised, and this in a nation where we beat our breasts about an "aging population." Of course our population will be aging if we murder so many of our children.

We also cry out about "child abuse," but apparently it is not child abuse to murder viable children right up to the hour of their birth, even when there are many childless people who would gladly offer these children a loving home. This too at a time when contraception has never been so readily available.

There is something terribly wrong with a society that thinks it is "progressive" to murder children and actually pay the murderers to do it via Medicare. At the same time there is the push for legal "surrogacy," often from the same people. We can only conclude that the real agenda is the destruction of the family and of a healthy family based society.

We pray that you will not be part of this process, and that you will reject this Bill in its entirety if it does come before Parliament.

Yours sincerely,

Robin Victor and Valerie Ruth Pym
