To whom it may concern, I Edward Pitt, a very concerned citizen. I am sick to death at the foolishness of those elected to manage the business of this state and this nation. Who get themselves elected just to push their own hidden agendas. Abortion being just one of them. Not only is abortion murder of a living human being, it is depleting our future generations. Which are needed to keep our nation up to strength, but also to support our ageing generation. Please tell these people if they have nothing better to offer the people of Australia and Queensland, SLING THEIR SILLY HOOKS.

Yours sincerely,
Edward Pitt.
