To whom it concerns,
I believe that science has clearly demonstrated that from conception, a human being exists.
I also believe this philosophically.
I believe that this has been the majority view of foetus' for as long as history itself.
I understand the women claiming their own rights, but.....
Who speaks for and stands up for the rights of the child, albeit unborn?
I oppose the Pyne abortion law out of the above, and strongly urge you to please take the same stand on life.
Thank you,
Trevor Langridge.
