---

Dear Sir/Madam

We wish to register our opposition to Rob Pyne's proposed abortion bill which offers no protection to the unborn child, or indeed, the mother, neither are any safeguards in place.

We oppose abortion - full stop, but to imagine viable babies being aborted is wholesale murder.

Yes, women should have control over their bodies; therefore they should take precautions. We have abortions being performed as day surgeries and the theatre next door is performing IVF. We have people crying out to adopt babies. This world has gone crazy. Make no mistake, women who abort a foetus of any gestational age always suffer psychological problems if not immediately, then in the months or years to follow.

Some women become pregnant post rape - true. However, two wrongs do not make a right. All children have a right to life.

Yours sincerely  
William & Jude
