Subject: Proposed Abortion Law Reform Bill...
Date: Saturday, 25 June 2016 1:30:37 PM

I wish it to be known that I strongly oppose any reform to the law which will remove the act of abortion from the criminal code.

Abortion is in fact, murder. A human being exists from the moment of conception and any attempt to deny this fact is tantamount to being an accessory before, during and after the fact- of murder.

Human life is the most precious gift we have.

A better solution to unwanted pregnancies is to totally review the adoption laws and make these infants easily available to those parents (a man and a woman) who are unable to produce their own. Please do not use the argument that these may be unsuitable as parents- after all the children are about to be murdered anyway- this way at least they will be in with a chance.

Thank you for receiving my submission.

Peter Hibbert
