To the Committee Members,

Thank you for undertaking the task to examine the Abortion Law Reform Bill and for the opportunity to voice my grave concerns about the changes proposed. I urge you to reject these changes as I believe removing current safeguards on abortions in Queensland would be dangerous to both the mothers and their unborn children at a time when they are both extremely vulnerable. Those involved in making decisions of life and death should continue to receive the best support and care within the existing guidelines, which already allow for as many abortions as other states. However far removed we are and however indirect the part we play, the consequences of these choices will be carried for life.

Please reject MP Pyne's Bill.

Yours sincerely,

Sarah Williams
