> To whomever it may concern;
>
> Please don't support the bill/bills that are trying to further abortions in Queensland (and other states). It is our duty to protect the innocent and I can think of no one more innocent than a small but fully formed human being who relies fully on others to protect its rights (a baby).
>
> Please do your research into the barbaric methods used to kill these babies, as well as the proven pain that they suffer during these "procedures" and then make an informed decision for yourselves.
>
> We protect animals, pets and the environment but choose not to protect babies and leave them to die when abortions fail. I leave you with this below. It may be graphic but this is happening. Please consider these things and make a decision your conscience can live with.
