Subject: Bill to remove abortion safeguards
Date: Saturday, 25 June 2016 11:08:59 PM

To the parliamentary review,

I oppose the proposed legislation to remove protection for the unborn children.

The proposed legislation legalises the the murder of fully developed children with immense consequences for the child, mother and family. These consequences may be immediate or take some time to surface leading to significant mental health issues.

Adoption in Queensland is almost impossible. If adoption was made easier, with appropriate controls and checks to minimise if not stop abuse, there are many families including us who would adopt unwanted children. These children have the right to be protected and given the gift of life. Many unwanted babies have gone on to make significant positive contributions to society that leave a lasting impact.

Under the proposed legislation it could have been you or I that were aborted. Do you want your name to be recalled in history as a sanction-er of murder legislation - that's one awful legacy to leave

Please reject this murderous legislation

Regards,

Allister
