Subject: Abortion: Submission
Date: Sunday, 26 June 2016 8:58:06 PM

Please find a submission regards Rob Pyne's legislation of abortion up until birth.

To allow abortion of a healthy full-term baby is murder in my opinion. If a mother can order the death of her healthy baby at birth, she can then murder her baby any time after birth and it's ok. Please tell me the difference here? Also the abortionist and all accessories are guilty of murder. You will be legalising murder of the most helpless. How barbaric is our society becoming to consider such a shameful act? Why would anyone WANT such a law??? Where is his heart and what is his motive? Does he hate life so much to want to kill innocent fully grown babies who would grow to become productive citizens in society given the chance. Any human happy and willing to introduce such a law needs psychiatric help and treatment in my mind. I am a qualified Counsellor and this is absolutely disturbing.

Psychologists and Counsellors know of the emotional damage that abortion does to women and these are women who have abortions much earlier in their pregnancies. Why does it affect them I wonder? Because deep down they know they have willingly killed a 'person'. Their conscience haunts them for life. This should not be happening. Shamefully many of these women are not given the emotional support and guidance they need before having an abortion or after. They get caught up in a sick system that actually encourages them... this is tragic. Nobody in this industry cares about babies lives or the mother's life...human life. I truly don't know how Rob Pyne, abortionists and their assistants can sleep at night. And how they can justify their actions as acceptable when they all need psychological help. Every person I have spoken to about this, young and old from all walks, are sickened and can't comprehend how this could ever be allowed. We are supposed to be a civilized society, but in fact we are regressing into the dark ages.
