Good Afternoon

I am writing to you to voice my opposition to this horrendous Bill. Unless for medical or mental health reasons or in cases of rape, I believe women who wish to have an abortion should do so in discussion with the father and a counsellor. It is not just about the woman's rights, the father has rights as well. In fact, so does an unborn child. Many couples are out there who would dearly love to adopt a baby and here you are terminating lives because it's a 'choice'. Has the Bill considered the long term consequences of having an abortion? The guilt laden thoughts and intense remorse down the track. Well then you should speak to the counsellors and psychiatrists that I have spoken with who deal with these women years after they have had an abortion. I oppose abortion, **especially** at a later stage in pregnancy when the baby, if born, could survive. It's madness and not just immoral but amoral.

Regards

Sia
